Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 101

1. The finality of the previous action has been vacated.

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. The claimed invention in claims 6-12 is directed to non-statutory subject matter.

Claims 6-12 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The current focus of the Patent Office in regard to statutory inventions under 35 U.S.C. § 101 for method claims and claims that recite a judicial exception (software) is that the claimed invention recite a practical application. Practical application can be provided by a physical transformation or a useful, concrete and tangible result. No physical transformation is recited and additionally, the final result of the claim is possibly executable code (software) comprising descriptive material (such that one first object communicates with another object directly ...) or just merely software components "a first object and a second object, which communicates with each other is not a tangible result because the claimed software is not directed toward a process (method), a machine (an apparatus or system with specific hardware components specified), a manufacture (for example, a computer storage medium comprising various interacting functions) or a composition of matter. Although, it appears that the system is directed toward an apparatus, nothing in the claims specify distinct hardware components. Therefore, the claims are not proper system claims.

4. Claims 1-5 and 13-17 are considered allowable over the prior art of record since the prior art references to Montgomery and Kasichainula are not considered to teach or

suggest the features of wrapping a reference to a second object within a second context with a proxy wrapper with the second context defining at least a second set of arbitrary invariants on a second set of arbitrary objects including the second object.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Chavis whose telephone number is (571) 272-3720. The examiner can normally be reached on M-F, 9:00am-5:30pm, EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Meng-Ai An can be reached on (571) 272-3756. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
